**SUBMISSION OF SECOND SUPPLEMENTAL  
INFORMATION DISCLOSURE STATEMENT**

Applicant's herewith submit a Second Supplemental Information Disclosure Statement relating to a recent published patent application.

Applicant's claims 42-73 each require a fluid manifold including a first or source selection portion including means for selecting a fluid source and a second or distribution portion with at least two fluid distribution channels and means for connecting each of the distribution channels to each of the reaction vessels in a different one of the sets or rows. That structure permits one to select a fluid source and to simultaneously connect that

selected source, via one of the distribution channels, to each of the reaction vessels connected to that distribution channel.

The reference lacks the above noted structure and capability.

This Second Supplemental Information Disclosure Statement is submitted before the mailing date of a final action or Notice of Allowance and no item of information contained in the Second Supplemental Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the Information Disclosure Statement was known to any individual designated in §1.56(c) more than three months prior to the filing of the Second Supplemental Information Disclosure Statement.

Respectfully submitted,

ROBERT L. EPSSTEIN (Reg. No. 26451)
